Job description – Profit Planning

[Manager]

Job Title: Profit Planning Manager

Purpose: The Profit Planning Manager leads the strategic planning and execution of the company's profit planning process. This role is responsible for aligning financial forecasts, budgets, and business plans with organizational objectives, enabling data-driven decision-making that maximizes financial performance and long-term value creation.

Main activities:

1.Strategic Profit Planning Leadership: Lead the short and mid term profit planning cycle, including budgeting, long-range forecasting, and business scenario modeling in line with the corporate strategy.

2.Team Management and Coordination: Manage a team of analysts responsible for profit modeling, financial projections, and variance analysis.ensuring high-quality deliverables that support strategic goals.

3. Forecasting and Financial Modeling: Oversee the development and refinement of forecasting models to project revenue, costs, margins, and profit and analyze key business drivers and market conditions to assess their impact on short- and long-term profitability.

4. Budget Oversight and Alignment: Coordinate the budgeting process across departments, ensuring financial plans are realistic, integrated, and performance-focused.

5. Scenario and Sensitivity Analysis: Lead the creation of “what-if” scenarios and sensitivity analyses to support contingency planning and executive decision-making. Evaluate the financial implications of business opportunities, investments, and risks.

6. Performance Monitoring and Reporting: Develop dashboards and performance reports to track actual vs. planned performance, providing clear insights and recommendations to top management to ensure timely corrective actions.

7. Process Improvement and Systems Development: Continuously improve planning tools, processes, and systems to enhance accuracy, agility, and cross-functional collaboration reinforcing the use of technology and data to drive smarter planning practices.

Job Title: Profit Planning Manager

Importance for the Organization:

- 1. Strategic Alignment:** Ensures that profit goals are aligned with business strategy, enabling the company to pursue growth while maintaining financial discipline.
- 2. Informed Decision-Making:** Provides leadership with robust financial insights and forward-looking analyses to support critical business decisions.
- 3. Financial Predictability:** Enhances the organization's ability to anticipate financial outcomes and prepare for different business conditions.
- 4. Performance Accountability:** Facilitates clear visibility into business performance relative to plan, driving accountability and timely corrective actions.
- 5. Resource Optimization:** Supports the efficient allocation of resources by identifying the most profitable business opportunities and cost-saving initiatives.
- 6. Risk Management:** Strengthens the company's ability to adapt to changing market conditions by preparing financial plans under various scenarios.

Job description – Second Wheel Business

[Manager]

Job Title: Second Wheel Business Manager

Purpose: The Value Chain & Profitability Control Manager is responsible for overseeing profitability analysis and value generation across the entire business value chain. The role combines financial leadership in margin and cost management with a strategic focus on evaluating business performance, supporting new initiatives, and ensuring optimal use of resources. This position plays a key role in connecting operational activities with financial outcomes to drive sustainable, profitable growth.

Main Activities:

- 1.End-to-End Value Chain Analysis:** Lead the financial evaluations of all businesses in the value chain by developing and tracking KPIs to understand the performance of each business.
- 2.Profitability Control and Monitoring:** Oversee margin and profitability tracking by business analyzing deviations from planned profitability and implement control mechanisms in collaboration with business stakeholders.
- 3.Financial Partnering for Cross-Functional Teams:** Collaborate with commercial and innovation teams to integrate financial logic into decision making process, ensuring that new business initiatives are aligned with strategic profitability goals.
- 4.Project Evaluation and Value Realization:** Review and challenge the financial justification of new business initiatives and transformation projects, tracking the delivery of expected financial benefits and identify corrective actions when necessary.
- 5.SAP System Implementation & Stabilization (TLAC):** Lead the deployment and stabilization of SAP Finance and Accounting modules across TLAC acting as a bridge between users, IT, and SAP consultants to resolve issues and improve system performance.
- 6.Scenario and Sensitivity Analysis:** Conduct profitability impact assessments of changes in input costs, pricing strategies, and external factors generating financial modeling and simulations to support strategic decision-making.
- 7. Reporting and Executive Communication:** Deliver profitability performance reports to senior management providing insights and recommendations to support business steering and tactical adjustments.

Job description – Second Wheel Business

[Manager]

Job Title: Second Wheel Business Manager

Importance for the Organization:

- 1. Integrated Financial View:** Combines operational and financial perspectives to drive decisions based on true business performance and value creation.
- 2. Support for Strategic Projects:** Provides strong financial governance and evaluation of new projects, ensuring alignment with long-term profitability goals.
- 3. System and Process Transformation:** Plays a critical role in the successful SAP rollout in TLAC, enabling automation, consistency, and better decision-making through reliable data.
- 4. Cross-Functional Collaboration:** Serves as a connector between finance and other business functions to foster accountability, transparency, and aligned execution.
- 5. Performance and Profitability Accountability:** Increases visibility of financial outcomes across the value chain and supports data-driven interventions.
- 6. Regional Leadership in Financial Excellence:** Establishes strong finance and accounting processes aligned with global standards, tailored to local needs, and positioned to support business growth in TLAC.
