DIMENSION ASSESSMENT AND PROFILE

| Dimension assessed                                                                                                                                                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Operational autonomy</b><br>Operates with periodic supervision. Makes decisions within their process using own judgment, escalating complex or out-of-protocol situations.                                                                                             |
| <b>Process complexity</b><br>Processes with moderate variability requiring interpretation and judgment. Questions how things are done, identifies improvement opportunities (Kaizen) and proposes adjustments to the team. Handles multiple tasks with interdependencies. |
| <b>Decision-making</b><br>Decisions based on fact and data analysis (PDCA). Evaluates alternatives, identifies root causes using structured methodology and resolves problems with own judgment within their area of responsibility.                                      |
| <b>Technical knowledge</b><br>Solid command of area tools and processes. Stays current in their field, proactively seeks new knowledge and applies it with autonomy.                                                                                                      |
| <b>Stakeholder management</b><br>Interaction mainly with the immediate team. Communicates task results following established channels and formats.                                                                                                                        |
| <b>Reporting level</b><br>Reports directly to the Coordinator or Area Manager. Output is visible to the leadership team and reviewed by the responsible manager.                                                                                                          |
| <b>Error impact</b><br>Errors with impact on the area or related processes. May generate rework, delays or inconsistencies requiring coordination to resolve.                                                                                                             |
| <b>Tools and technology</b><br>Advanced command of area tools. Uses complex functionalities, automates repetitive tasks and proposes improvements in existing system usage.                                                                                               |

Analyst

Profile with consolidated operational autonomy. Applies own judgment, collaborates with other areas and contributes process improvements. Operates with low supervision.
