DIMENSION ASSESSMENT AND PROFILE

Dimension assessed
Operational autonomy Operates with periodic supervision. Makes decisions within their process using own judgment, escalating complex or out-of-protocol situations.
Process complexity Routine, well-defined processes with standardized steps and low variability. Errors are detected and corrected quickly.
Decision-making Operational decisions limited to clear procedures. Consults before acting when faced with unforeseen situations.
Technical knowledge Solid command of area tools and processes. Stays current in their field, proactively seeks new knowledge and applies it with autonomy.
Stakeholder management Regular interaction with Finance counterparts and stakeholders in Argentina and/or Brazil. Coordinates information, aligns criteria and maintains effective working relationships beyond the immediate team.
Reporting level Reports directly to the Coordinator or Area Manager. Output is visible to the leadership team and reviewed by the responsible manager.
Error impact Errors with impact on the area or related processes. May generate rework, delays or inconsistencies requiring coordination to resolve.
Tools and technology Basic use of standard area tools (Excel, SAP, reporting systems). Requires support for advanced functions.

Analyst

Profile with consolidated operational autonomy. Applies own judgment, collaborates with other areas and contributes process improvements. Operates with low supervision.
