DIMENSION ASSESSMENT AND PROFILE

Dimension assessed

Operational autonomy

Operates with periodic supervision. Makes decisions within their process using own judgment, escalating complex or out-of-protocol situations.

Process complexity

Multi-variable, high-complexity processes. Designs solutions beyond existing standards, leads improvement initiatives and trains others in new methodologies. Manages ambiguity with autonomy.

Decision-making

Decisions based on fact and data analysis (PDCA). Evaluates alternatives, identifies root causes using structured methodology and resolves problems with own judgment within their area of responsibility.

Technical knowledge

Deep technical expertise, recognized within the team. Shares knowledge, develops capabilities in others and leads adoption of new practices or methodologies.

Stakeholder management

Regular interaction with Finance counterparts and stakeholders in Argentina and/or Brazil. Coordinates information, aligns criteria and maintains effective working relationships beyond the immediate team.

Reporting level

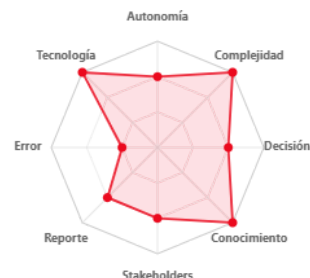

Reports directly to the Coordinator or Area Manager. Output is visible to the leadership team and reviewed by the responsible manager.

Error impact

Errors with limited impact on the immediate process, correctable in the short term without significant consequences for the area or internal client.

Tools and technology

Advanced proficiency with DX/AI orientation. Leads or drives the adoption of digital tools or artificial intelligence to make processes more efficient, aligned with the TLAC ONE TOYOTA initiative.

Analyst

Profile with consolidated operational autonomy. Applies own judgment, collaborates with other areas and contributes process improvements. Operates with low supervision.
