DIMENSION ASSESSMENT AND PROFILE

Dimension assessed

Operational autonomy

Operates with periodic supervision. Makes decisions within their process using own judgment, escalating complex or out-of-protocol situations.

Process complexity

Processes with moderate variability requiring interpretation and judgment. Questions how things are done, identifies improvement opportunities (Kaizen) and proposes adjustments to the team. Handles multiple tasks with interdependencies.

Decision-making

Decisions based on fact and data analysis (PDCA). Evaluates alternatives, identifies root causes using structured methodology and resolves problems with own judgment within their area of responsibility.

Technical knowledge

Solid command of area tools and processes. Stays current in their field, proactively seeks new knowledge and applies it with autonomy.

Stakeholder management

Regular interaction with Finance counterparts and stakeholders in Argentina and/or Brazil. Coordinates information, aligns criteria and maintains effective working relationships beyond the immediate team.

Reporting level

Reports directly to the Coordinator or Area Manager. Output is visible to the leadership team and reviewed by the responsible manager.

Error impact

Errors with impact on the area or related processes. May generate rework, delays or inconsistencies requiring coordination to resolve.

Tools and technology

Advanced command of area tools. Uses complex functionalities, automates repetitive tasks and proposes improvements in existing system usage.

Analyst

Profile with consolidated operational autonomy. Applies own judgment, collaborates with other areas and contributes process improvements. Operates with low supervision.
