DIMENSION ASSESSMENT AND PROFILE

Dimension assessed	
Operational autonomy Operates with periodic supervision. Makes decisions within their process using own judgment, escalating complex or out-of-protocol situations.	
Process complexity Processes with moderate variability requiring interpretation and judgment. Questions how things are done, identifies improvement opportunities (Kaizen) and proposes adjustments to the team. Handles multiple tasks with interdependencies.	
Decision-making Decisions based on fact and data analysis (PDCA). Evaluates alternatives, identifies root causes using structured methodology and resolves problems with own judgment within their area of responsibility.	
Technical knowledge Deep technical expertise, recognized within the team. Shares knowledge, develops capabilities in others and leads adoption of new practices or methodologies.	
Stakeholder management Management of high-relevance stakeholders: Managers, Directors, regional counterparts. Builds relationships autonomously, negotiates positions and represents the area in decision-making forums.	
Reporting level Reports to Management or General Management. Output is presented to senior leadership (GM, Director, CEO) with impact on strategic decisions.	
Error impact Errors with financial, reputational or strategic impact. May affect reports to headquarters, business commitments or senior management decision-making.	
Tools and technology Advanced proficiency with DX/AI orientation. Leads or drives the adoption of digital tools or artificial intelligence to make processes more efficient, aligned with the TLAC ONE TOYOTA initiative.	

Senior Analyst

High-impact profile. Leads complex processes, manages multiple stakeholders, incorporates advanced tools and contributes to team development.
